STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

ORDER

APPLICATION 13920

PERMIT 8379

LICENSE 7267

ORDER ALLOWING CHANGE IN THE
POINT OF DIVERSION AND AMENDING THE LICENSE

WHEREAS:

1. License 7267 was issued to Peary Hannum and June Hannum and was recorded with the County Recorder of Yuba County on May 6, 1965 in Book 413, Page 239.
2. License 7267 was subsequently assigned to Roy A. and Mary K. Stass.
3. A petition for change in the point of diversion has been filed with the State Water Resources Control Board and said Board has determined that good cause for such change has been shown.
4. The license paragraph pertaining to the continuity authority of the Board does not conform to the current version and will be replaced.
5. The Board has determined that the petitioned change does not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The point of diversion under this license shall be as follows:

North 1,200 feet and East 1,600 feet from SW corner of Section 1, T14N, R4E, MDB&M, being within the SE $\frac{1}{4}$ of SW $\frac{1}{4}$ of said Section 1, being at California Coordinates, Zone 2, N 518,300 and E 2,147,400.

2. The continuing authority provision in this license shall be amended to contain Section 780, Title 23, California Administrative Code which reads as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing

evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
